Digital transformation is one of the most scenarios that industries are adapting today, and at a much faster rate than ever. There are many approaches to migrating to the cloud – each with their own benefits and drawbacks. It is obviously very important to engage a knowledgeable as well as an experienced team who knows what it takes to deal with such a strategic milestone for a company. In a most recent project, as a 'Trusted Advisor' to the client, Madiba led a strategic re-platforming to the cloud project for one of their fortune 500 client. Our teams participated right from the planning, design, migration execution, testing and the hyper-care support in a 99.99% uptime environment. The program resulted in a seamless movement to AWS cloud including moving their databases from Oracle to SAP HANA. It provided the client ability to move to more automated processing, expanded user experiences and real time analytics and reporting, as well as higher processing speeds. Some highlights were:

- End-2-End automated move
- Multiple parties involved including SAP Max-attention
- Engaged 200+ business testers
- 35 AWS tools & 49 standard operating tools
- 75 KPI's integrated into AWS for real time monitoring & dashboards
- Solution Manager 7.2 Application Monitoring
- AWS Cloud Watch for Infrastructure Monitoring
- Automation push across infrastructure, application, and business processes
- Dedicated teams on security and compliance with a range of Cyber tools

Taking the decision to move applications or entire services to the cloud can be a bold step change to a company. However, a cloud-enabled business model is the stand-out way for a business to innovate and discover new opportunities. It is an incredibly exciting time when a company decides that it plans to migrate to the cloud. Each businesses' cloud strategy is unique to them but follow the same set of principles. At Madiba, our goal is to provide the you best in industry guidance, consulting and advice 'unique to your situation' to help you archive your Digital Transformation goals in a manner that is quicker and seamless at the same time yields into cost savings at both short and long term.
